Subject: ERG Contract

Hey Shaun,

I have been trying to connect with Greg to no avail, and discovered that you are the CO for AED's ERG contract. I was hoping we might be able to use about 40 hours of that contract to do some evaluation of NSPS 0000a compliance reports. We want to evaluate what folks have been reporting for their fugitives monitoring program and try to do some analysis to see if the time estimates we are using in the rulemaking are reasonable (e.g. how long it takes them to do a monitoring event and how many they can do in a day). We also want to try to discern which of the well sites are low production well sites (we can use Drilling Info for this, and I am working with Rusty Wasem to accommodate that work).

Let me know if this is even possible, capacity-wise, and if so I can flesh out some tasks. Thank in advance.

Marcia B Mia
